

# HUMANITY WELFARE COUNCIL

“ To Grow and Expand ”

“A peaceful and just world which is free from all forms of discrimination and exploitation with equal opportunities for growth and development for all”

"The Best part of life begins when we start sharing"  
-Surya Pratap Singh

# ABOUT US

**H**UMANITY WELFARE COUNCIL (HWC) is a Non-Profitable Organisation. A National level Organization in India with the mandate of protecting and promoting the interests of socially & economically excluded people, women and children. Since its inception HWC have played a pioneering role in transforming traditional ideas of charity and introducing the concept of philanthropy to make a real difference to communities. Through grant-making, direct implementation and co-partnership strategies, support and drive innovation in the areas of natural resources management; education; healthcare and nutrition; rural livelihoods; enhancing civil society and governance; media, arts, crafts and culture; and diversified employment. The Organisation engages with competent individuals and government bodies, international agencies and private sector organisations to nurture a self-sustaining eco-system that collectively works across all these areas.

In addition to promoting and facilitating initiatives in elementary education, the organisation also award fellowships and merit scholarships to students pursuing higher studies. It grooms social scientists, cancer specialists, nuclear scientists and distinguished institutional administrators, who in turn have striven to make the country a power to reckon with in various fields, including science and technology. The Organisation also supports causes and initiatives that provide disaster relief and aids in rescue work in case of calamities. In order to enhance impact and ensure that interventions are sustainable.

## OUR VISION

"A peaceful and just world which is free from all forms of discrimination and exploitation with equal opportunities for growth and development for all"

## OUR MISSION

"The mission of Humanity Welfare Council (HWC) is to promote safe, secure, environmentally sound, efficient and sustainable development through cooperation."

# OUR PROGRAMMES

## GROVEINDIA PROGRAMME

The GROOVEINDIA PROGRAM is a broad philosophy, ideology, and social movement of the Humanity Welfare Council which concerns about the environmental protection and improvement of the health of environment...

## LITINDIA PROGRAMME

LITINDIA PROGRAMME is an initiative of Humanity Welfare Council to curb illiteracy from the Nation. This programme involves a continuum of learning and enabling individuals to achieve their goals, to develop their knowledge...

## WELLINDIA PROGRAMME

The motto of our health care policy is that "No individual should fail to secure adequate medical care because of inability to pay for it ". The health services should provide fully developed institutional facilities necessary for proper diagnosis and treatment.

## BLOOMINDIA PROGRAMME

The vision of THE HUMANITY WELFARE COUNCIL is to provide social security to the people of lower strata of the society by which they may be able to live a descent life with all the living rights.

# PROJECTS

## PROJECT PHULWARI

**P**roject PHULWARI is an initiative of Humanity Welfare Council in the field of child care and development. Anganwadi centres are very popular among local people and if properly utilised can help in resolving many issues among children.

Project PHULWARI recognises these Anganwadi Centres (AWCs) as the most important unit in society development. We aim to act as the backbone of such centres by providing them assistance in meeting their targets and thus making the ICDS programme and the efforts of the Indian Government successful. Project PHULWARI lays emphasis on holistic development of children. The focus is on children from age group 0 years-5 years which is a period of physical and mental growth. This project is specially designed to reach disadvantaged and low income groups. The project is aimed to break an intergenerational cycle of under nutrition which leads to lower cognitive development, which results in lower learning capacities.

A study found that Anganwadi's running under ICDS programme is not particularly effective in reducing malnutrition, largely because of implementation problems. Humanity Welfare Council is trying to fulfil this gap. Legislative policy, plan and programme commitments including a range of national programmes to improve early child development outcomes remain a real challenge. Certainly there is a need for higher investment, greater commitment at all levels besides application in terms of design, delivery and development to restore overall growth and development of children.

“Social Cooperation to Modernise Anganwadis”

To provide benefits to Anganwadi's, list of following basic items have been recognized

- One Carpet (10'x12')
- 20 Learning Books.
- 20 Colour Books.
- 20 Crayons Set.
- 20 Water bottles.
- 20 School Bags.
- 20 Plates and Spoons.
- 20 Plastic Chairs.
- One Music System (Story-telling Session).
- One Water Purifier.
- Soft and Creative toys.

### **Vision of Project PHULWARI –**

No child should be left behind in the race of growth and development due to lack of facilities.

### **Mission of Project PHULWARI –**

The mission of Project PHULWARI is every child should get good nutrition, safe and secure environment and right to play.

## PROJECT CURE+

*We are here for you.*

Project Cure is an initiative of the Humanity Welfare Council in the field of Health Care under WellIndia Programme. The motto of our health care policy is that "No individual should fail to secure adequate medical care because of inability to pay for it ". The health services should provide fully developed institutional facilities necessary for proper diagnosis and treatment.

Our main target group are the people from lower socio-economic groups which are lagging behind in the process of growth and development.

Reducing the uneven access to public health care system between the better and owned and the more vulnerable sections of the society is the main

corner stone of our health care policy.

Our main emphasis has been laid on the implementation of health programs through local people. There is need to ensure improved standard of public health and family welfare. Use of generic medicine, awareness about alternative medicine systems like Ayurveda, Homeopathy, Naturopathy, and Yoga are some of the main focus of our health care system.

# Project UPHAAR

**P**roject UPHAAR is an initiative of the Humanity Welfare Council (HWC) to encourage people to Donate. Donating to the causes you care about not only benefits the charities themselves, it can be deeply rewarding for you too. Millions of people give to charity on a regular basis to support causes they believe in, as well as for the positive affect it has on their own lives.

It sounds somewhat contradictory, but one important aspect of building wealth is charity.

Charity is viewed as important in our society, but the true reason for charity isn't always taught. Religions reinforce charity with the tenets around giving and tithing. Many of us even lose interest thinking whether the money will be utilized in a proper manner or not.

When we donate irrespective of what we donate? Whether it is money or articles. It is always our responsibility to track where our donations are utilised. Donations are good but if properly utilized they can bring a lot of change in the societies.

We accept all kinds of donations whether it is money or any article that either you want to donate or you are no more using it. For example your child is no more playing with his/her toys and you have no further use of those toys. You can send it to us and we will make it available to those children who can't afford it. Your little effort will not only bring smile and happiness in the lives of those children but it will also give you a feeling of satisfaction.

## Item that can be donated

- Food
- Clothes
- Toys
- Footwears
- Stationary
- Old newspaper
- Electronic items
- Any article that is not in use. But in good condition.

## Vision

- Effective use of resources and minimise wastage.
- Mission of Project UPHAAR
- Promote generosity among people

# Project SHELTER

Housing is one of the basic requirements of human beings. Adequate shelter for each and every household is a fundamental pre-requisite for a healthy living in any society. From a social point of view a house provides significant economic security and status in society. For a homeless person a house brings about a profound social change in his existence, endowing him with an identity. A house or shelter, how so ever serves all aspect of basic need of poor households without which it is difficult to survive. It provides them both physical and mental strength and psychological base on which they can fall back while accessing other basic needs such as food, clothing, etc. For a poor household, a house constitutes an asset that can be offered as a collateral security for a loan during difficult periods. A house also protects a poor household from the vagaries of nature, in the absence of which they are forced to take to streets and live in open. Apart from a house provides security to people. Desire to have a shelter of any kind devoid of sanitary facilities can well be observed in urban areas, where the slums exist for providing shelter to the people of lower income groups.

## VISION

Our Vision is to provide shelter to all in form of house with basic facilities, who can't afford it?

## MISSION

The mission of Project SHELTER is to end homelessness and create a co-operative environment.

# Project GREEN SUN

Electricity generated through coal plants is becoming expensive day by day. Power cuts and increasing dependence on DG sets is causing a lot of damage to the environment. The demand supply gap for electricity is increasing in the country which makes it very important for people to start thinking of other ways of realizing their energy needs.

India is faced with the challenge of sustaining its rapid economic growth while dealing with global threat of climate change. There are some observed changes in climate parameters in India too, like increase in surface temperature by 0.4 °C, variation in monsoon patterns, rise in sea levels by 1.06-1.75mm per year, extreme weather conditions breaking over 130 years records, Erratic water flow in perennial rivers originating from Himalayas. Alongside, the fast depleting conventional sources of power generation have worsened the situations of energy crisis.

## Key Points

- Providing access to a minimal supply of clean energy – enough to power two LED lights for a few hours and charge a mobile phone – is probably not enough to significantly improve people's lives.
- A study has revealed that homes that had received basic access to clean electricity for the first time, have spent less on expensive kerosene for lighting, a benefit to families and environment.

- Access to a couple hours a day of electricity was not enough to boost savings, help launch new businesses, increase time spent working or studying, or otherwise significantly improve people's lives.

## Vision

The vision is to ensure that solar energy is the leading contributor to India's energy system.

## Mission

The mission of project GREEN SUN is to accelerate the adoption of solar power technology across the country, to conserve our environment and provide a sustainable and conflict free power supply.

# Project **BLUE SHOWER**

Project BLUE SHOWER means conservation of water by promoting Rainwater harvesting systems, building wells, water tanks and other such systems. Rainwater harvesting is a simple method by which rainfall is collected, stored, utilised in different ways or directly used for recharge purposes. With depleting groundwater levels and fluctuating climate conditions, Rainwater harvesting can go a long way to help mitigate these effects. Capturing the rainwater can help recharge local aquifers, reduce urban flooding and most importantly ensure water availability in water scarce zones. Though the term seems to have picked up greater visibility in the last few years, it was, and is even today, a traditional practice followed in rural India.

This water conservation method can be easily practiced in individual homes, apartments, parks, offices and temples too, across the world. Farmers have recharged their dry bore wells, created water banks in drought areas, green farms, increased sustainability of their water resources and even created a river.

## **VISION**

To make each human being on this planet self dependent on their daily water needs and also conserve each drop of water for the future.

## **MISSION**

The mission of Project BLUE SHOWER is "SAVE WATER, SAVE FUTURE".

# Project GREY BOOK

**W**ith the development of internet, mobile phones, mobile apps, laptops and other modern devices, things are becoming more and more digitalised in today's world. With the population of 1.31 billion people in a country, the ratio to technology driven citizens has highly increased in last decade. With approx 140 million mobile phone users and being a country for the second most social site users, India has an immense opportunity to grow in this field and to grasp the positive vibes of technology in the field of education, medicine, defence, business and much more.

With huge possibility in digital technology, our prime minister introduced initiatives like Digital India to transform India into a digitally empowered society and knowledge economy. Digital India is a concept to revitalize the education system in India. It is a program that endeavours to bridge the literacy slippage by delivering education through digital platform to children and teachers. It provides an opportunity to access learning sources through a global platform, providing reach ability to teachers and breaking the barriers to gain quality education through physical classes.

## Key Points

- Personalised and adaptive learning
- Two-way conversations in E-learning
- Mobile-based Learning

- Video-based Learning
- Open Educational Resources
- Usage Of Virtual Reality (VR) And Augmented Reality (AR) For Learning

## Vision

To combine teaching and learning with technology and to provide best possible digital education for everyone.

## Mission

No one should lag behind in digital revolution.

# Project RASOI

Project RASOI is an initiative by Humanity Welfare Council to promote community kitchen. To begin with, community kitchens are not only a food security measure for those who cannot fend for themselves (e.g., the elderly, ill, disabled, destitute, etc.). In fact, such initiatives are equally important for working people in urban areas (from rickshaw pullers to delivery boys who are on the road the whole day) as a source of inexpensive and nutritious food. This is amply evident outside the All India Institute of Medical Sciences in Delhi at meal times. The queues for free meals served by charitable bodies can be up to a kilometre long.

Such kitchens can also be viewed as a response to market failures where street food is concerned. Many urban poor do not have much option but to rely on street food. When there are price spikes (in recent times dal, onions before that), the poor are often the hardest hit. Community kitchens can provide relief at such times by offering food at fixed prices.

## VISION

The vision of Project RASOI is "No one sleeps empty stomach".

## MISSION

The mission of Project RASOI is to make "INDIA HUNGER FREE".

# Project

## BUNDELKHAND

**B**undelkhand region is the most backward region of the country with grim face of poverty. Due to its distinctive geographical features the region has many disadvantages which makes it backward socially economically and industrially.

Humanity Welfare Council has chosen Bundelkhand region for Phase 1 of its development programmes. The research team of HWC closely studied the factors behind the backwardness of the region and found that some of the factors are natural but, most of the factors are anthropogenic. Some of the findings are as follows-

- Poor resource based
- Low and unreliable rainfall
- Infertile Land
- Extreme Climatic Conditions
- Illiteracy
- Poor Communication
- Low Industrial growth

Bundelkhand is struck by occurrence of regular scarcity of water which slows down all the course of growth and development as agriculture is the main livelihood of the area. It leads to severe livelihood crisis, escalating helplessness, migration, farmers suicide, child and bondage labour etc.

Based on the above findings humanity welfare Council designed action cum research projects. The programmes of HWC are democratic in nature and are true reflection of people's real aspiration and needs. A common person should identify and ready to participate in development projects which aim to their social and economic welfare.

To fulfil its objectives HWC will open centres where following services will be provided –

- Health services under Project Cure
- Nutrition under Project Rasoi
- Digital Education under Project Grey Book
- Free legal Services
- Modernising Anganwadis under Project Phulwari
- Development of village and cottage industries under BloomIndia Programme
- Water conservation under Project Blue Shower
- Promotion of solar energy under Project Green Sun
- Awareness regarding government schemes

Public cooperation for financial assistance is required for this project as HWC will be covering a vast area of development and the people will be benefiting on a large scale. Development in such areas will help in the development of the nation as a whole and will reduce stress on the already overburdened metropolitan cities.

# Donation Box Program

## Fundraising Guidelines

**T**hese guidelines are to assist businesses, groups and individuals who are interested in fundraising on behalf of Humanity Welfare Council (HWC), through hosting a Donation Box.

### Responsibilities as a fund raiser

As the fund raising organiser, you are also responsible for researching and complying with all State/Territory laws and regulations relating to your fund raising activity. To meet requirements for the use of the Donation Boxes, the following criteria must be met:

- Donation Box (s) must be securely fastened to a counter or bench.
- Donation Box (s) must be emptied and counted at least once a month.
- Only people authorised by HWC may open or count the contents of Donation Box(s) and two people must be present at any opening of the Donation Box and counting of the donations.
- The serial number, which is located on the back of the Donation Box, must be recorded on the reconciliation form and referenced when the funds are banked.

### Upholding Humanity Welfare Council standards

All funds raised on behalf of HWC must fit with the aims and values of HWC. Therefore we require that no funds are raised through:

- The promotion of alcohol;
- Any false commitment on behalf of funds;
- Dangerous or high-risk activities

### Banking the funds raised

All funds collected from the Donation Boxes can be forwarded to HWC in the form of a bank cheque, personal cheque, bank transfer, credit card or money order made out to HWC, along with a remittance form.

### By Direct Deposit:

For bank transfers in, please use the following bank account details:

**Indusind Bank Account: "Humanity Welfare Council"**  
**Account number: 201002023770**  
**Ifsc Code: INDB0000044**

Please reference your unique Donation Box number and send your transaction receipt to [info@Hwc.international](mailto:info@Hwc.international).

### By Mail:

Cheques or money orders made payable to "Humanity Welfare Council" please mail to:  
Humanity welfare Council  
Corporate Office: B-1, 638A, 2nd Floor,  
Janakpuri, New Delhi-110058.

### By Online:

For online donations you can visit our website – "[www.hwc.international](http://www.hwc.international)".

If you are facing any issue while making online donations, you can submit the issue through the "general query" form or mail us at "[info@hwc.international](mailto:info@hwc.international)"

If you have any questions about the information provided, please do not hesitate to contact us. Thank you for your generosity and kindness towards developing a better world.
